

The purpose of the application **Yourdeemy** is to create an online MOOC course content provider with personalized learning design. The application contains Home Page, Register/Login Page, Logged in Page, Course offerings, Reward and Feedback Page. Initially, when the user first lands on the home page of our application, they can view all the different course offerings which we offer. They can also view the different features of the dynamic layout, in order to utilize them, the user would have to login to our application by navigating to the login/register. Additionally, the platform incentivizes user engagement through a rewards program that recognizes achievements and fosters a sense of community. The feedback page offers users the opportunity to provide valuable insights and suggestions to help improve the platform, fostering a collaborative learning environment.
